

Alpha Energy and Electric Inc. & KCP&L team up for EPRI Monitoring Projects

Alpha Energy and Electric, Inc. is proud to be a part of the KCP&L EPRI Monitoring Project. This \$24 million grant funded by the U.S. Department of Energy will help in funding a SmartGrid project in many neighborhoods located in a portion of Midtown in Kansas City.

This project is an effort to help many homes in these neighborhoods become more energy efficient by providing them with the various appliances that they qualify for. We are extremely excited to work together with KCP&L as we strive to continue our efforts of going green.

We are proud to be a part of this laudable project; we strive to provide value for our customers through innovative design build approaches. Providing our clients with uncompromising level of excellence with integrity from planning to implementation. Alpha Energy and Electric, Inc.: Helping in powering the economy.
